LOGISTICS
SUPPLY CHAIN
FREIGHT
INNOVATION

Intercargo delivers peace of mind. With years of experience in the industry, you can rely on Intercargo for all of your shipping needs.

Intercargo offers a broad range of transportation solutions including economy, express, and expedited shipping services for packages and heavy-weight freight.

Logistics

Logistics is built on relationships which are nurtured through trust and confidence that we as a logistics solutions provider deliver on our commitment to you and your clients. We have invested time and money in making logistics processes simple to understand.

We stand by our motto:

Logistics Simplified.

Supply Chain

In the current global challenging financial climate Intercargo has been at the forefront of taking risks, keeping its services flowing throughout without compromising on service levels to our clients. We were able to do this as we have always been up to date with our technologies. We ensured minimal impact to our clients which was very important for us as it demonstrates our integrity and trust that is kept between us and our clients.

Freight

We have built fantastic alliances with all major carriers in the world, whether it be airlines or shipping lines allowing you to receive the best possible service at competitive prices. Intercargo is also asset based and has its own fleet of Vehicles and Trailers to complement our services and deliver.

In 2022 we have added curtainsider and box trailers to our fleet to help deliver goods fast, keeping your goods secure whilst retaining complete control of your deliveries - fully tracked.

Innovation

Through the use of Technology, Intercargo has paved the way in being one of the first to provide online air freight bookings since 2010 and has constantly been kept up to date with the latest innovations. We now have one of the strongest automated tracking systems giving customers real time milestones so they know exactly where their shipments are at any time of the day or night. This is achieved through tracking updates, notifications and our dashboard.

We look to build long lasting relationships that instill trust.

02 PUTTING YOU FIRST

We want you to be comfortable in knowing that your supply chain is in safe hands. We do this by putting a lot of emphasis on one of the basic fundamentals that often get overlooked in logistics and that is “Customer Service”.

For that reason not only have we ensured implementation of the most up to date technology, but also that our staff roles are tailored to provide key customer experience. This starts with Key Account Managers and is backed operationally through our operational excellence coordinators. Their job is to ensure that we truly are putting you first.

03 SERVICES

AIR FREIGHT

SEA FREIGHT

ROAD FREIGHT

CUSTOMS CLEARANCE

CONTRACT LOGISTICS
WAREHOUSING

With weekly consolidations to many destinations, we can offer frequent schedules, shortest connections and capacity backed by our dedicated experienced air freight teams to ensure that your shipments are handled with utmost importance. We understand the urgency in air freight and have developed the best technological solutions so that you are kept up to date each step of the way.

Air Freight Logistics

Intercargo is at the forefront of the air freight market. We hold our strategic partnerships with airlines with great importance as being a key cornerstone of our success in the air freight world. We rank in top 5 of the IATA statistics for certain key destinations that we are proud to serve to our customers which also gives us immense buying power allowing us to provide premium solutions at competitive prices.

Examples of our automated milestones that keep you updated on the journey are as follows but not limited to:

- 1 Creation of booking
- 2 Shipment being collected
- 3 Shipment arriving at export depot for processing
- 4 Shipment being handed over to the airline
- 5 Shipment planned to depart
- 6 Shipment Export Customs Clearance
- 7 Shipment Departure including any legs
- 8 Shipment Arrival
- 9 Shipment Release to Consignee / Delivery

The largest ship can transfer up to **18,000 containers** and to put that into perspective, it would equal **745 million bananas**.

Sea Freight Logistics

Sea freight is one of the most cost and emission effective solutions logistics has to provide. 20ft and 40ft containers being the most common containers used, it is arguably the number 1 method to move goods internationally across waters. With increased capacity (almost 55,000 commercial ships), importing products from China or exporting finished goods to your clients in the Middle East has never been easier.

Through the use of technology, we are able to analyse your needs and provide you with instant sailing schedules and bookings to meet your customers demands. No more waiting around, book, load and sail.

For full loads (FCL) we offer containers, if you don't have a full load we have part load (LCL) solutions to give you cost effective transport for the actual amount of goods you wish to send.

Road Freight Logistics

We work with some of the largest brands to ensure goods are collected and delivered between distribution hubs. We know the importance of ensuring goods are delivered on time. We work with our clients to understand their exact needs including time slots for loading and unloading as well as keeping loads safe and secure.

24/7 tracking 365. Dedicated support provided by our transport department ensuring full legislative compliance.

With our dedicated transport team, we can provide tailor made solutions to ensure that your goods are delivered in the shortest span schedule. Our team work with you to put together a plan that meets your needs. Need an early load, need wait and deliver, we are here to assist.

TILBURY	MANCHESTER
KILLINGHOLME	CHATHAM
PURFLEET	

We have a knowledgeable clearance team in place to deal with all types of customs clearances. Whether it be home use, return goods relief, Transit T1/T2 or Inward processing relief.

We have badges at all major airports and seaports ensuring inhouse clearance for complete visibility and control.

We are connected with HMRC through CDS and prelude entries to ensure minimal customs impact.

We also look to provide advise to help benefit our clients in ensuring proper declaration and compliance with customs regimes.

Contract Logistics Warehousing

Intercargo provides you access to warehousing space across the UK to meet your needs and demands. Depending on your commodity, we ensure that your goods are handled correctly.

Our key account managers work with you to really understand your product and what it requires to be stored and then distributed.

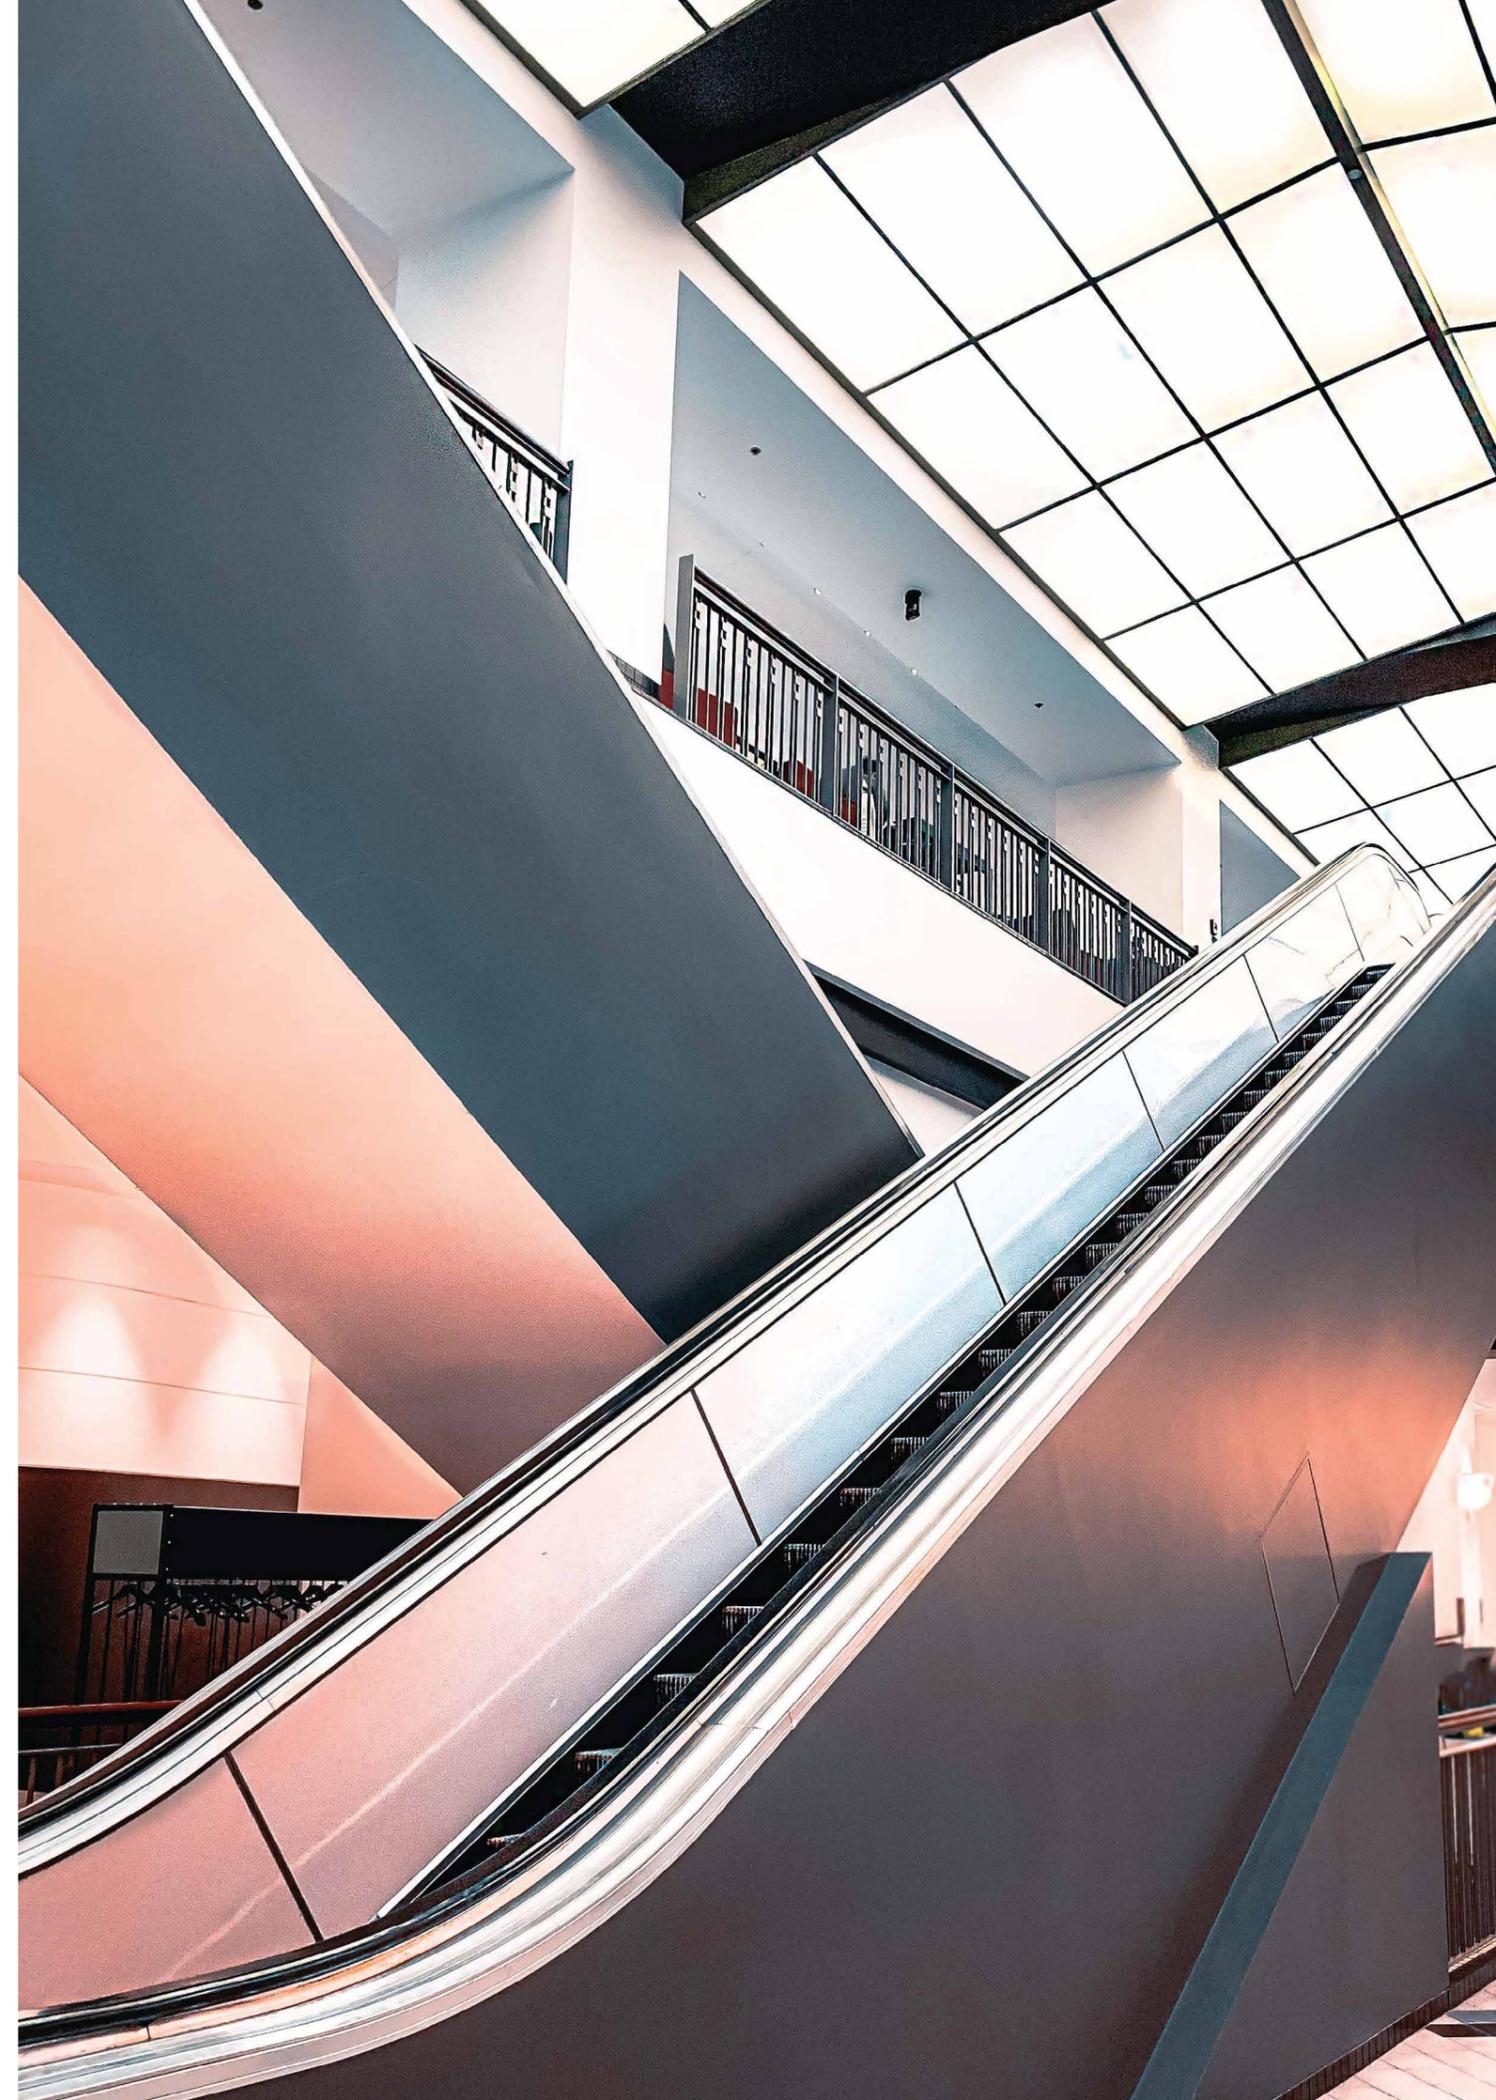

We then create standard operating procedures to ensure that the goods are handled correctly.

Full warehouse reporting along with errors and exceptions are handled through our warehousing system that we make available to you and your teams 24/7.

05 SUSTAINABILITY

We at Intercargo care about our planet. The logistics industry uses fuel powered vehicles, vessels and planes in order to transport lots of essential items across the world and we want to ensure that we are contributing and adopting positive environmental friendly and target driven changes to keep our planet protected from harmful emissions.

We work with carriers who are investing in technology whether it be the electric/less emission emitting vehicles or planes whereby sustainable measures are used to ensure the carbon emissions are being offset. For example, a big partner carrier of ours, Air France-KLM have introduced goSAF, a new alternative for airfreight customers to reduce their CO2 footprint.

This is all part of our pledge to tackle climate change, achieving net-zero CO2 emissions in 2050. We hope you will join us in being part of this journey.

Together We Can
Make A Logistical
Difference.
